MINISTER'S MESSAGE

Alberta's exports enjoyed another strong year in 1994. The value of goods and services exports increased by 16.1% to \$25.1 billion. Export of goods alone increased 16.9% to \$23.0 billion.

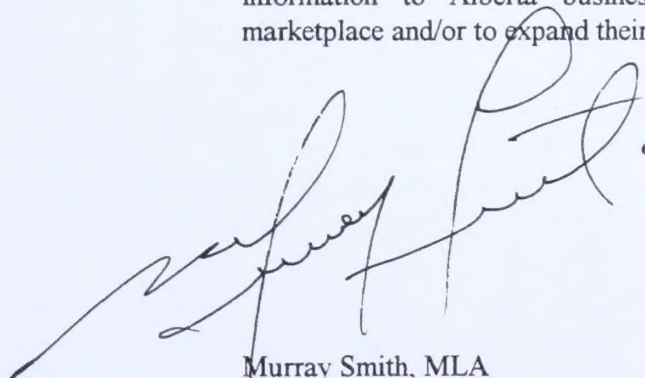

Alberta has always been a trading province, active in international markets. Today, Albertans recognize their economic future is clearly tied to continuing success in the global marketplace. While primary energy and agricultural commodities remain major exports, the following commodities are also crossing Alberta borders, *en route* to international markets, in increasing numbers:

- petro-chemicals and forest products
- processed food items
- petroleum exploration and development equipment
- electronics and telecommunications products
- environmental products and services

Our growth depends on increasing the value of our exports, particularly the export of value-added goods and services. Expanding our industries and infrastructure will require new investment from across Canada and around the world.

The Alberta Advantage includes a highly-skilled and productive workforce, the lowest overall taxes in the nation, a strategic location, and vast supplies of natural resources. However, the key advantage that we offer business is our dedication to free enterprise.

The Government of Alberta believes that our future growth depends on our ability to work in partnerships to increase our exports, and to attract investment to the province. This publication will provide useful information to Alberta businesses aiming to enter the global marketplace and/or to expand their international sales.

Preface

International trade is vitally important to the increased growth of the Alberta economy. The value of Alberta's exports of goods and services increased 16.1% from \$21.6 billion in 1993 to \$25.1 billion in 1994.

Primary goods still dominate Alberta's goods exports, with a total value of \$15.0 billion in 1994. The export of primary goods remains the backbone of Alberta's goods exports. Combined, oil, gas, and sulfur remained the single largest commodity export with a value of approximately \$12.6 billion, or 50.4% of Alberta's goods and services exports. Primary agriculture also remained an important sector valued at \$2.4 billion, or 9.5% of total exports.

International exports generate wealth for the province and create jobs. The Alberta Government is working to increase the attractiveness of doing business with Alberta companies through:

- a competitive tax and regulatory regime
- investment in human resources
- a supportive infrastructure
- a reduction in the provincial deficit
- establishing a Flexible Business Network program to encourage industry-led economic development and strategic partnerships

These new flexible partnerships will make Alberta's industry more competitive on the international stage.

These actions have been largely successful. The value of international goods and services exports has increased since 1989. The Alberta economy is diversifying into value-added, or manufactured goods exports. Manufacturing exports represented 30.8% of Alberta's goods & services exports in 1994. This is the second largest sector after mining. Manufacturing exports were \$7.7 billion, three times that of primary agriculture exports.

Alberta exported to over 150 countries in 1994. The largest single market remains the United States, representing 80.3% of Alberta's exports of goods. Japan and South Korea were the second and third largest markets, accounting for 6.1% and 2.3%, respectively, of Alberta's goods exports.

This review of Alberta's 1994 export performance is intended to provide Alberta business with valuable information on current export markets.

About the Data

This publication provides a convenient data source for Alberta's international trade in goods. A profile is given for each country that imported over \$5 million worth of Alberta's goods in 1994. Each profile not only lists the top 15 commodities Alberta exported to that country but also compares them with Canadian exports. A summary of export totals to all countries is included in Appendix B.

The trade commodity nomenclature used is the Harmonized Commodity Description and Coding System (Harmonized System or HS), adopted by Statistics Canada in 1988.

Exports by geographic region, industry, and commodity are also provided in the following sections. Statistics Canada regional groups are used. Industry groupings are based on Statistics Canada's publication on concordance between export commodity and industry classifications (see Appendix A). For commodities, six-digit HS codes have occasionally been grouped in order to present more commonly understood descriptions.

For the purposes of this publication, six-digit HS codes are presented in the country profile tables. For simplicity, commodity descriptions accompanying these codes may have been revised slightly from their standard format. Readers requiring the exact content of a particular HS number are referred to the Customs Tariff Schedule of Canada.

In 1990, a new system of data exchange was initiated between Canada and the United States. Improved data capture resulted in higher export values for most categories of commodities traded to the United States. While this will not affect comparison between 1994 and 1993 data, caution should be used in interpreting longer-range trends that include export data to the United States.

Statistics Canada is the main source of information for the publication. However, Alberta Agriculture, Food and Rural Development publishes export statistics for agricultural commodities which more accurately reflect Alberta's contribution to Canada's agricultural production for export. Their system is based on HS codes, but better allocates exports to their point of origin. For this report, agricultural revisions have not been included. In addition, Alberta Economic Development and Tourism recently funded a study on forestry, *Review of the Economic Impact of the Forest Industry in Alberta*. The study takes an extensive look at forestry in Alberta, including exports. In particular, the study identified Alberta's forest product exports to be approximately \$1.7 billion in 1993. This figure, and others in the study, may differ from those in this publication as a result of differences in methodology, the approach used in allocating exports to point of origin, and industry definitions. The informational captions appearing at the top right corner of each country profile are from *Handbook of Nations, 14th Edition*.

The term "exports" refers to "domestic exports", goods grown, extracted or manufactured in Canada. This includes goods of foreign origin which have been materially transformed in Canada and then re-exported.

Unfortunately, service exports cannot be included on a country specific basis since these data are not presently available. However, total service exports, including tourism, have been provided in the "Year in Review" section. Throughout the remainder of this document, "exports" will refer strictly to merchandise exports.

The Year in Review

Alberta's export of goods and services in 1994 totaled \$25.1 billion, an increase of 16.1% over 1993. In particular, exports of goods grew by 16.9%, from \$19.7 billion in 1993 to \$23.0 billion in 1994. This growth rate was slightly below the 20.7% rate at which Canadian exports of goods grew between 1993 (\$176.8 billion) and 1994 (\$213.4 billion). An estimate of Alberta's services exports showed a growth of 7.9%, for a total of \$2.0 billion. Tourism increased 4.8% to \$807.9 million, and other services increased 10.0% to \$1.2 billion.

Alberta's strong overall growth in 1994 exports was primarily a result of the strength in the manufacturing sector. The value of manufactured exports increased by \$1.9 billion (33.3%) over 1993 to a value of over \$7.7 billion. Manufacturing sub-sector figures contributing to this were: electrical and electronics (+65.3%), food, feed and beverages (+28.8%), chemicals and chemical products (+25.9%), and refined petroleum and coal products (+28.8%). The agricultural sector also showed strong growth in 1994 (+26.0%) after a 17.2% decline in the previous year.

Alberta's 1994 export market included over 150 countries worldwide. Regionally, exports increased in each area, with the exception of the Middle East and Eastern Europe. Exports to these two regions decreased by 14.6% and 63.8%, respectively. Growth rates for exports to the other regions were: 15.4% for the United States, 69.4% for Oceania, 68.6% for Western Europe, 35.3% for Africa, 27.4% for South America, 24.0% for Asia, and 23.7% for Central America.

Each of Alberta's top 10 export markets in 1994 experienced growth over 1993. In particular, significant increases were recorded in: Belgium (+278.5%), South Korea (+54.3%), United Kingdom (+42.0%), Taiwan (+41.2%), and Mexico (+40.7%).

International exports are key to Alberta's economic growth and well being. In fact, goods and services exports accounted for more than 30% of Alberta's 1994 gross domestic product. However, there were many factors which influenced Alberta's trade, such as:

- declines in the value of the Canadian dollar in 1994 relative to the U.S. dollar;
- economic restructuring and instability in Eastern European countries;
- overall growth in the Asian countries;
- elimination of tariffs as outlined by the North American Free Trade Agreement (NAFTA);
- increases in the prices of Alberta's key resource commodities (e.g. pulp and paper, natural gas, wheat and petroleum gases); and,
- higher levels of investments into Alberta exports.

Alberta Exports by Industry, Commodities and Country

The value of Alberta's goods and services exports increased from \$21.6 billion in 1993 to \$25.1 billion in 1994, an increase of \$3.5 billion (16.1%). This growth was mostly attributable to commodity exports in manufacturing (up \$2 billion), mining (up \$837 million), and agriculture (up \$493 million). In addition, 1994 services exports were estimated to have grown by 7.9% over 1993.

Unfortunately, services exports are difficult to measure since there is little data available on this broken down by country or industry. As a result, unless otherwise specified, the remainder of this document will refer to "exports" as strictly commodity (merchandise) exports.

The mining sector, led by oil, gas, and sulphur exports, continued to be Alberta's dominant export sector. The value of all mining exports increased by 7.1% to \$12.6 billion, representing over one half of Alberta's goods and services exports. The oil, gas, and sulphur products made up almost all (94.4%) of Alberta's mining exports for 1994.

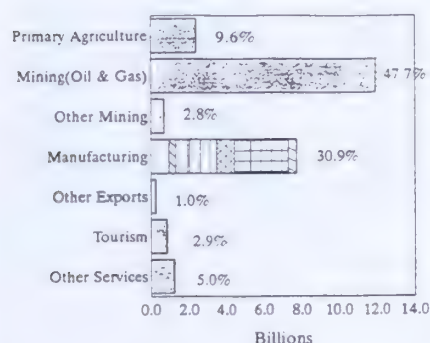

Of the sixteen manufacturing sub-sectors, textiles and machinery were the only sub-sectors that recorded decreases. Textile industry exports decreased by 12.1% while machinery exports decreased by 11.1%. However, as a result of strong performances in many of the other sub-sectors, manufacturing exports for 1994 increased to over \$7.7 billion, a \$1.9 billion (33.3%) increase over with 1993.

Within the manufacturing industry, significant growth was recorded in the following sectors: the paper and allied products, up 93.0% to \$853.3 million; primary metal products, up 67.4% to \$224.3 million; electrical/electronic equipment, up 65.3% to \$615.7 million; and, wood products, up 54.3% to \$427.9 million.

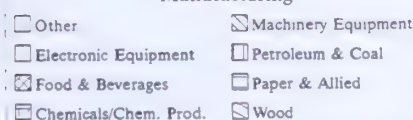

With a value of just over \$2 billion, the chemicals and chemical products sub-sector was the largest contributor to manufacturing exports. Exports of these products grew by 25.9%, and made up 8.1% of all goods and services exported. The refined petroleum and coal products sub-sector, which represented 6.1% of all goods and services, also provided strong growth with an increase of 28.8% over 1993. The food, feed & beverage sub-sector also recorded an increase of 28.8%, accounting for \$970 million worth of exports.

Agriculture, Food and Beverages

Agricultural revisions have not been included in this report. The reader is therefore encouraged to contact Alberta Agriculture, Food & Rural Development for revised information.

The value of primary agriculture, food and beverage exports from Alberta increased by 26.8% to a value of \$3.4 billion in 1994. The two principal exports in this area were wheat (\$813.3 million) and live cattle (\$601.5 million). Exports of these two products increased by 23.3% and 13.8%, respectively, between 1993 and 1994. Other growth areas included increases of 94.7% in canola/colza seed, 94.5% in canola and mustard oil, and 46.2% in canola/colza seed oil cake.

Alberta's Main Markets

(includes Food & Beverage Manufacturing)

1994 Total Value of Agricultural Exports \$3.3 Billion

Alberta's primary market for agriculture, food, and beverage products was the United States, followed by Japan and the Peoples' Republic of China. The United States accounted for 52.9% (\$1.8 billion) of these exports, Japan represented 14.5% (\$486.9 million), and China represented 4.9% (\$163.4 million).

The dollar value of agricultural exports to the United States increased from \$1.4 billion in 1993 to \$1.8 billion in 1994, a difference of 31.1%.

Similarly, China increased its imports of Alberta's agricultural products by 42.0%, from \$114.2 million in 1993 to \$163.4 million in 1994. However, Japan only imported \$474.9 million worth of these goods, 2.5% less than in 1993.

Forestry, Wood, and Paper and Allied Products

Alberta's 1994 forestry exports increased by 78.6% over 1993 to a value of \$1.3 billion. This was largely attributed to a 105.4% growth in wood pulp exports. Wood pulp exports accounted for \$790.9 million. Products such as particle board and lumber also had large increases, 49.8% and 65.4%, respectively.

1994 Total Value of Forestry Exports \$1.3 Billion

Combined, the United States, Japan, and South Korea imported 78.4% of Alberta's forestry products. The United States was the largest importer of these products in 1994, accounting for \$562.7 million (43.6%) of Alberta's forestry exports. Japan and South Korea were the second and third largest markets with 25.7% and 9.0%, respectively.

Exports of Alberta's forestry products increased significantly to the U.S. (39.0%), Japan (122.9%), and South Korea (251.3%), compared to 1993. The value of forestry exports increased from \$404.7 million to \$562.7 million for the U.S., from \$149.3 million to \$331.4 million for Japan, and from \$33.0 million in 1993 to \$116.0 million for South Korea.

Mining (Oil, Gas, Sulphur, Coal/Other Mining and Refined Petroleum)

The mining sector, mainly oil and gas products, has consistently been the largest exporting industry in Alberta. In 1994, these exports grew by 9.1% to a value of \$14.2 billion. Mining products accounted for 61.6% of total commodity exports.

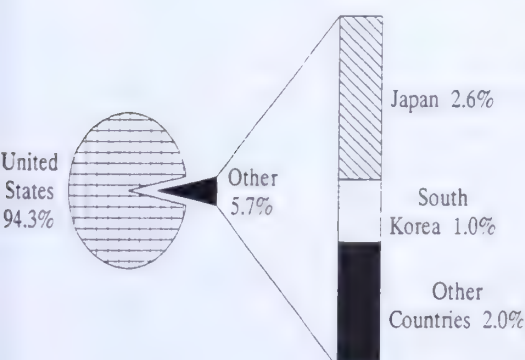

With an increase of 15.3%, natural gas was Alberta's top commodity export in 1994. Its dollar value increased from \$5.4 billion in 1993 to \$6.2 billion in 1994. Crude petroleum exports, traditionally Alberta's top export, stood at \$5.5 billion, decreasing 1.4% since 1993. Alberta exported \$659.8 million worth of coal. This was also down slightly (1.8%) from last year. Overall, exports of most of the top mining products increased over the previous year. Specifically, increases occurred in liquefied petroleum gases such as propane, butane and ethylene (up 25.1% to \$1.2 billion), petroleum oils other than crude (up 27.3% to \$294.8 million), and sulphur (up 53.9% to \$204.3 million).

(includes Refined Petroleum Products)

1994 Total Value of Mining Exports \$14.1 Billion

Alberta's primary market for major mining and refined petroleum exports was the United States. Overall, the U.S. imported \$13.4 billion, or 94.3%, of these commodities. This was a 9.3% increase over the previous year. Japan, the second largest market, imported 14.3% less than it did in 1993, bringing its total to \$374.4 million.

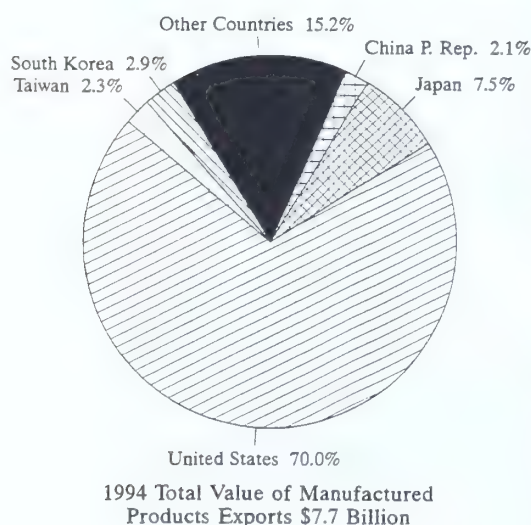

Manufacturing

Exports of manufactured products were up by 33.3% in 1994, compared to the previous year. The total value of manufacturing exports reached \$7.7 billion. With the exception of textiles and machinery, each sub-sector within manufacturing recorded an increase. Some of the more dramatic increases were: 93.0% in paper and allied products (from \$442.1 million to \$853.3 million), 67.4% in primary metal products (from \$134.0 million to \$224.3 million), 65.3% in electrical/electronic equipment (from \$372.4 million to \$615.7 million), and 54.3% in wood products (from \$277.3 to \$427.9 million).

Manufactured Products Exports Alberta's Primary Markets

Wood pulp exports, valued at \$791.0 million, more than doubled since 1993 to become the top manufacturing commodity export. Many of the other top manufacturing exports were from the chemicals and chemical products sub-sector, specifically, polyethylene, ethers, styrene urea, and ethylene glycol. Polyethylene had the second highest value with \$608.3 million, followed by liquefied propane at \$398.0 million, and beef at \$385.9 million.

Alberta Exports to Asia, 1994

Total Value of Exports \$2.9 Billion

Due to significant growth in the value of exports to Asia from Alberta, many sectors experienced large increases in its value of exports.

However, the smaller sectors seem to have experienced significant decreases compared to 1993. Alberta's major exports to Asia were from the manufacturing sector. The value of manufacturing exports increased from \$1.0 billion in 1993 to \$1.5 billion in 1994, a 44.1% increase. Manufacturing exports accounted for 52.3% of Alberta's exports to Asia. Primary agriculture was the second largest export sector, accounting for 26.7% of Alberta's exports to Asia, or \$760.7 million. This was followed by mining, accounting for 19.9% or \$567.1 million, chemicals and chemical products (17.9%, or \$509.8 million), and paper and allied products (15.1%, or \$429.9 million).

Japan

Japan was the largest Asian export market for Alberta. Almost half of the province's exports to Asia were to Japan. Since 1993, the value of exports increased 11.0%, from \$1.2 billion to \$1.3 billion in 1994. The five year average annual growth in Alberta exports to Japan was 4.1%. This compares favourably with Canada's average growth of 4.0%. Canada exported a total of \$9.5 billion to Japan in 1994. Alberta's share of Canadian exports to Japan was 13.8%.

Coal was the largest commodity export to Japan. Valued at \$366.9 million, coal accounted for 27.8% of Alberta's total exports to Japan and 29.1% of Canada's coal exports to Japan. Canola, valued at \$205.2 million, was Alberta's second largest export to Japan. In 1993, Alberta did not export any canola to Japan. One-third of Canada's canola exports were from Alberta. Alberta's third largest export was chemical wood pulp, either non-coniferous or coniferous. In contrast to Canada, coal exports ranked second, canola ranked fourth, and chemical wood pulp ranked third.

South Korea

Over the last five years, 1994 proved to be the strongest year for Alberta exports to South Korea. In 1994, Alberta exports to South Korea totaled \$493.3 million, compared to \$319.7 million in 1993. This represented a 54.3% increase.

Of the \$2.2 billion in Canadian exports to South Korea, Alberta accounted for 22.8%. Over the past five years, the average annual growth of Alberta exports to South Korea surpassed Canada's (9.8% versus 8.8%).

Twenty-eight percent of Alberta's exports (\$139.9 million) to South Korea were coal. This represented 44.2% of Canada's \$331.6 million in coal exports to South Korea. Wheat exports to South Korea increased dramatically (36.4%), from \$78.6 million in 1993 to \$107.2 million in 1994. Alberta's third largest export was chemical wood pulp, valued at \$93.4 million. This was a 533.0% increase from 1993 values of \$14.7 million. Canada's major exports to South Korea were wheat (\$458.9 million), coal (\$331.6 million), and chemical wood pulp, either coniferous, or non-coniferous (\$282.4 million).

China was Alberta's third largest market in Asia, and Alberta's fourth largest market overall. In 1994, Alberta exported \$339.2 million in goods compared to \$289.5 million in 1993. This was an increase of 17.2%. The five year average annual percent change in Alberta's exports to China show a decrease of 2.8%. This was contrary to the value of Canadian exports to China which increased at an average of 6.5%.

Alberta's largest export to China was wheat. The value of this export was \$138.9 million. This represented a 40.6% increase over the \$98.8 million exported in 1993. Wheat exports to China accounted for 40.9% of all goods exported to China in 1994. Of the \$589.2 million in Canadian wheat exports, Alberta accounted for 23.6%. Alberta's second largest commodity exported to China was artificial filament tow, valued at \$35.5 million, a decrease of 47.2% from 1993 values of \$67.2 million. Ethylene glycol exports increased 36.4% from \$23.7 million in 1993 to \$32.4 million in 1994.

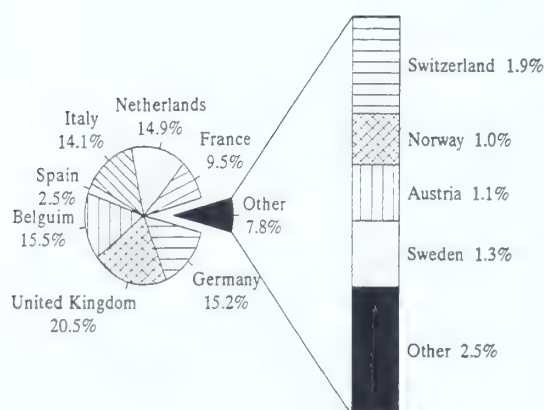

Western Europe

The value of exports to Western Europe continued to grow. Between 1993 and 1994 there was a 68.6% increase, from \$459.5 million in 1993 to \$774.5 million in 1994. This was the sixth consecutive increase. Over the last five years, the average annual percentage increase was 23.0%. The United Kingdom was Alberta's largest Western European market with a value of \$158.5 million in 1994. Belgium replaced Italy as the second largest market with a value of exports of \$119.7 million. Germany was Alberta's third largest Western European market with a value of \$117.5 million, followed by the Netherlands (\$115.7 million), and Italy (\$109.5 million). Each of these countries experienced increases of at least 14% over 1993.

Total Value of Exports \$774.5 Million

Almost two-thirds (63.1%) of Alberta's exports to Western Europe were manufactured goods. Exports of manufactured goods were valued at \$488.3 million in 1994 compared to \$349.4 million in 1993, a 40.9% increase between the two years. Primary agricultural exports were the second highest valued export to Western Europe in 1994. At \$200.1 million in 1994, primary agricultural exports experienced a remarkable 281.6% increase from the 1993 values of \$52.4 million. Manufactured paper and allied products accounted for 25.1% of Alberta's exports to Western Europe. This commodity increased from \$96.1 million in 1993 to \$194.5 million in 1994, a 102.5% increase in exports. Primary metal products also experienced significant growth of 72.2%, from \$53.3 million in 1993 to \$91.8 million in 1994. Primary

metal products accounted for 11.9% of Alberta's exports to Western Europe.

United Kingdom

The United Kingdom accounted for 20.5% of Alberta exports to Western Europe. Exports were valued at \$158.5 million, placing the United Kingdom as Alberta's sixth largest market. Exports to the United Kingdom increased 41.2%, from \$111.7 million in 1993 to \$158.5 million in 1994. While Alberta's exports to the United Kingdom have increased at an average annual rate of 21.4%, Canadian exports have decreased 2.0%.

Major exports to the United Kingdom included coal, semi-chemical wood pulp, telephone sets, and telephonic or telegraphic switching apparatus. Coal exports, valued at \$34.4 million, accounted for 21.7% of Alberta's total exports to the United Kingdom, and 75.8% of Canadian coal exports. In 1993, Alberta exported \$17.2 million in coal to the United Kingdom. This represented a 101.1% increase between 1993 and 1994.

Semi-chemical wood pulp was Alberta's second highest valued export to the United Kingdom at \$20.7 million. This was a 10.9% increase from 1993 values of \$18.7 million. Telephone sets, at \$15.2 million, were the third largest commodity exported to the United Kingdom. This was a 29.7% increase from 1993's value of \$11.7 million. Canada exported a total of \$15.6 million in telephone sets to the United Kingdom. Alberta's share of Canada's exports of this commodity was 97.6%. Similarly, Alberta's share of Canada's exports of telephonic or telegraphic switching apparatus was 99.2%. Telephonic or telegraphic switching apparatus closely followed, in terms of value, that of telephone sets. Telephonic or telegraphic switching apparatus increased from \$11.6 million in 1993 to \$14.6 million in 1994, a 25.6% increase.

Belgium

Belgium represented Alberta's second largest Western European market, and the tenth largest overall market. Exports to Belgium increased 278.5%, from \$31.6 million in 1993 to \$119.7 million in 1994. Canadian exports to Belgium also increased a dramatic 46.7%, from \$896.2 million in 1993 to \$1.3 billion in 1994. Over the last five years, Alberta's average annual growth in exports to Belgium has been significantly higher than Canada's (26.2% versus 2.1%).

The reason for the significant increase in the value of exports to Belgium was the export of canola. As the largest Alberta export, canola was valued at \$59.6 million in 1994. This export alone accounted for 49.8% of Alberta's exports to Belgium. In 1993, Alberta did not export canola to Belgium. Canola was also Canada's largest export to Belgium. At a value of \$179.2 million, this increased 703.2% from 1993 values of \$22.3 million.

Alberta's second largest export to Belgium was chemical wood pulp. Valued at \$719 thousand in 1993, this commodity increased in value by 1,394.4% to \$10.7 million. Canadian exports of chemical wood pulp experienced an increase of 53.9%, from \$86.9 million in 1993 to \$133.8 million in 1994.

Germany

The value of exports to Germany, Alberta's third largest Western European market, increased a dramatic 93.5%. In 1993, Germany was Alberta's 15th largest overall export market with a value of \$60.7 million. In 1994, Germany ranked as Alberta's 11th largest overall market with exports valued at \$117.5 million. Alberta exports to Germany have continued to increase since 1990, resulting in an average annual increase of 39.2% for the five year period. Canada's exports grew from 1990 to 1993, but decreased 8.4% between 1993 and 1994, resulting in an average annual decrease of 0.4% for the five year period.

Increasing from \$2.8 million in 1993 to \$20.7 million in 1994, a 642.8% increase, chemical wood pulp was Alberta's leading export to Germany. Chemical wood pulp, non-coniferous, accounted for 17.6% of Alberta's exports to Germany in 1994. Canola was Alberta's second highest valued commodity export to Germany at \$18.0 million. This was significant since Alberta did not export canola to Germany in 1993. Exports of chemical wood pulp, coniferous, was valued at \$16.5 million while semi-chemical wood pulp was valued at \$16.1 million. It is evident that wood pulp, in general, is a significant import for Germany given that it accounted for a total of \$53.3 million, or 45.3%, of all exports.

Netherlands

The Netherlands remained Alberta's 12th largest overall market despite importing 68.1 % more in 1994 versus 1993, from \$68.9 million to \$115.7 million. Over the past five years, Alberta exports to the Netherlands have fluctuated from year to year. However, over the past five years, the annual average growth in Alberta's exports to the Netherlands was 26.9%. This cannot be said for Canadian exports to the Netherlands which experienced an annual average decrease of 5.3%.

Alberta exported \$27.6 million in cobalt to the Netherlands, accounting for 96.1% of Canada's exports of cobalt. Alberta exports of cobalt to the Netherlands increased from \$9.0 million in 1993 to \$27.6 million in 1994, a 208.0% increase. Nickel exports were the second highest valued export at \$22.2 million. This was a 27.4% decrease from the 1993 values of \$30.4 million. However, Alberta accounted for 99.5% of Canada's nickel exports. Canola was Alberta's third largest export to the Netherlands at \$21.2 million. Alberta did not export canola to the Netherlands in 1993. In 1994, \$11.9 million worth of coal was exported to the Netherlands, compared to zero in 1993.

South America

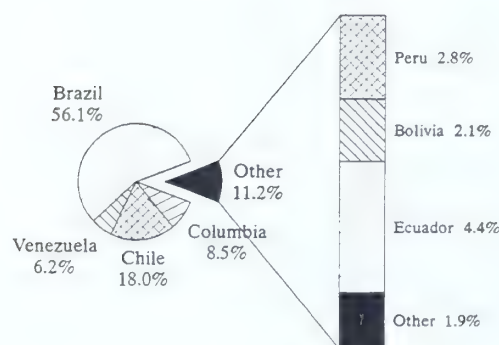

South America was the fourth largest region for Alberta goods exports. The value of Alberta exports to South America has varied from year to year. In 1994, Alberta exported \$247.3 million in goods, compared to \$194.1 million in 1993, a 27.4% increase. Since 1990, the average annual increase of Alberta exports to South America was 9.3%. Brazil, with Alberta imports of \$131.2 million, accounted for 53.0% of Alberta's exports to South America. Brazil was Alberta's seventh largest overall market in 1994. Chile was the second largest South American market and 23rd overall. This was a considerable move from being ranked 33rd overall in 1993. Colombia was the third largest South American market, valued at \$19.8 million, and accounted for 8.0% of Alberta's exports to South America.

Since 1990, exports to South America have increased at an average annual rate of 9.3%. This average was significantly moderated by Brazil whose average annual increase was 12.3%. For the South American countries, the average annual increases and decreases between 1990 and 1994 ranged from -19.4% for Peru to +107.7% for Bolivia.

Exports of primary agricultural products increased 16.8%, from \$116.3 million in 1993 to \$135.8 million in 1994. The mining sector, mainly oil & gas products, accounted for 27.6% of Alberta's exports to South America. The value of these exports increased from \$46.5 million to \$68.4 million, a 46.9% increase. Manufactured products accounted for 16.6% of Alberta's exports to South America; however, no single manufacturing sector significantly stood out.

Chile was Alberta's second largest South American market, and 23rd overall market. Valued at \$41.9 million in 1994, Alberta exports to Chile increased 27.8% over 1993's value of \$17.0 million. Chile accounted for 16.9% of Alberta's exports to South America. Since 1990, the value of Alberta exports to Chile averaged an annual growth of 27.8%, outstripping the Canadian annual average of 12.2%.

Over one-third (37.9%) of Alberta's exports to Chile were wheat. The value of wheat exports increased from \$6.5 million in 1993 to \$15.9 million in 1994, a 145.7% increase. The value of Canada's wheat exports also increased (85.7%), from \$27.3 million in 1993 to \$50.8 million in 1994. Coal was Alberta's second largest export with a value of \$7.4 million in 1994, compared to \$3.8 million in 1993, a 96.4% increase. Almost half (45.5%) of Canada's coal exports to Chile were from Alberta. This was a significant increase in Canada's market share. In 1993, Alberta exported 20.8% of Canada's total coal export. Durum wheat and sulphur were the third and fourth largest Alberta exports, valued at \$4.9 million and \$4.6 million, respectively.

Colombia

Alberta exports to Colombia remained relatively unchanged between 1993 and 1994, decreasing 0.3%. Colombia imported \$19.8 million worth of goods from Alberta in 1994. Over the past five years, Alberta's average annual exports to Columbia have decreased 1.2%, contrary to Canada's 20.6% growth.

Wheat was the most significant export to Colombia, valued at \$14.6 million. Wheat exports decreased 7.0% from 1993's value of \$15.7 million. Contractor's equipment, to be returned to Canada or re-export after completion of the contract, was the second highest valued Alberta export at \$1.5 million. Beans were the third largest Alberta export, valued at \$1.3 million.

Middle East

The Middle East represented the fifth largest region for Alberta's exports. Alberta exports to the Middle East decreased from \$210.9 million in 1993 to \$180.1 million in 1994, a 14.6% decline.

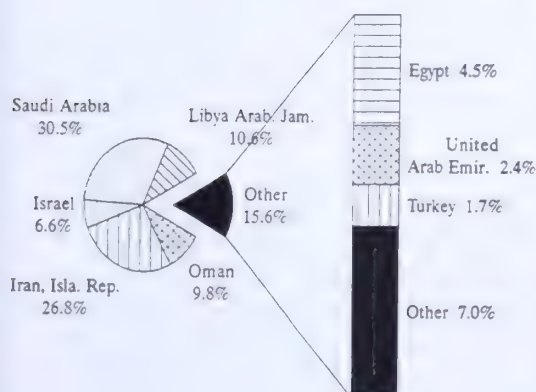

Approximately 45.3% of Alberta's exports were destined for Iran. Iran ranked as Alberta's sixteenth largest market overall. Alberta's exports to the Middle East have remained relatively constant over the past five years except for a boom in 1991 when exports increased 81.2%.

Primarily as a result of this anomaly, the average annual percent change for the region has decreased only 11.2% in the past 5 years.

Iran was Alberta's largest market in the Middle East, representing 45.3% of the exports to this region. The value of Alberta's exports to Iran increased 44.4%, from \$56.5 million in 1993 to \$81.6 million in 1994. Iran remains Alberta's sixteenth largest overall market for goods. Since 1990, the value of Alberta exports to Iran have experienced many swings which resulted in an average annual increase of 2.4%. Canadian exports to Iran has also experienced some dramatic changes, but less so than Alberta. Canada's average annual increase since 1990 was 5.8%.

Almost all (86.2%) of Alberta's exports to Iran were wheat. Alberta's wheat exports increased an incredible 173.1%, from \$25.8 million in 1993 to \$70.4 million in 1994. Similarly, Canadian wheat exports increased between 1993 and 1994 (176.1%). Wheat exports accounted for 67.6% of Canada's exports to Iran. Distilling, or rectifying plant, was the second largest export with a value of \$8.9 million. Alberta did not export this product to Iran in 1993.

Saudi Arabia

In 1994, Saudi Arabia dropped from being Alberta's thirteenth largest market to twenty-sixth. The value of Alberta exports to Saudi Arabia declined 63.6%, from \$64.4 million in 1993 to \$23.4 million in 1994. Alberta exports to Saudi Arabia have not recovered to 1990's level of \$98.4 million. Each year, the value of exports fluctuates dramatically. As a result, since 1990, the average annual change in the value of Alberta exports has been a decrease of 30.1%. This trend is contrary to Canadian exports to Saudi Arabia which experienced continued growth since 1990, resulting in an average annual increase of 19.4% in the value of exports.

Barley was the largest commodity export to Saudi Arabia in both 1993 and 1994. In 1993, Alberta exported approximately \$60.7 million in barley, compared to \$19.4 million in 1994. This represented a 68.0% decrease in Alberta barley exports between 1993 and 1994. This decline was reflected in Canadian barley sales to Saudi Arabia which decreased 63.6% between 1993 and 1994. Alberta's exports of telephone headsets also suffered a decrease (- 47.1%), from \$1.6 million in 1993 to \$841.8 thousand in 1994. Canada's largest commodity exports to Saudi Arabia were tanks and other armoured fighting vehicles, which increased from \$146.9 million in 1993 to \$314.7 million in 1994 (114.2% increase).

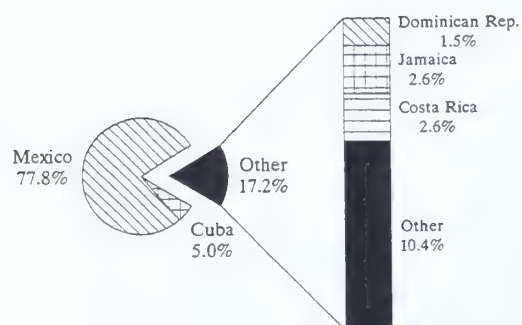

Central America, Mexico and the Caribbean

Since 1990, Alberta exports have generally increased, resulting in an average annual increase of 13.4%. The majority of Alberta's exports were to Mexico. Mexico imported 77.8% of Alberta's goods in this region. Cuba was Alberta's second largest Central American market at \$7.8 million. Costa Rica and Jamaica were almost tied as Alberta's third largest market in this region with exports valued at approximately \$4.0 million.

Alberta's leading export to Australia was urea. In 1993, Alberta exported \$7.1 million in urea to Australia, but this increased to \$28.8 million in 1994. This represented a 304.2% increase. Urea accounted for 31.5% of Alberta's exports to Australia, and 99.9% of Canada's exports of urea. Polyethylene was Alberta's second largest export, valued at \$16.2 million in 1994. This was a 22.4% increase over 1993 values of \$13.3 million. Alberta's polyethylene exports to Australia accounted for 89.9% of Canada's polyethylene exports to Australia.

New Zealand

The five year average annual growth in Alberta exports to New Zealand was 1.3%. Canada's five year average annual growth was -2.9%.

Polyethylene was Alberta's largest export to New Zealand at \$8.2 million. This was a 53.2% increase from 1993 values of \$5.3 million. Alberta's share of Canada's polyethylene exports in 1994 was 89.5%. Sulphur was also a significant export to New Zealand from Alberta. Sulphur exports increased 17.5%, from \$5.4 million in 1993 to \$8.2 million in 1994. Seventy-two per cent of Canada's sulphur exports to New Zealand came from Alberta.

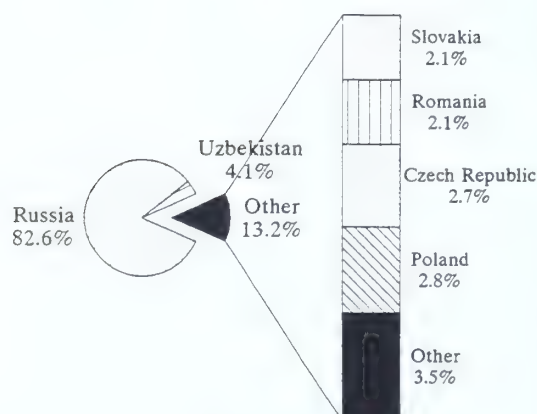

Eastern Europe

Eastern Europe represented Alberta's smallest regional market. In 1994, the value of Alberta exports was \$80.4 million, 63.8% less than the previous year. In 1993, Alberta exports to Eastern Europe were \$222.3 million. Russia, Alberta's largest market in this region, was largely responsible for this decrease. In 1993, Russia was Alberta's fifth largest market, but in 1994 Russia dropped to 19th position. The average annual percent change in the value of exports to Eastern Europe, since 1990, was a decrease of 31.7%. Alberta exports to Eastern Europe have ranged from a low of \$80.4 million in 1994 to a high of \$399.7 million in 1991.
